

Hook Security Reporting Plug-In

The KillPhish Reporting Plug-In is a complementary feature with your Hook Security Subscription.

This feature is not necessary to utilize, but is the only integrated reporting plug-in that communicates with our tests and updates the reports automatically.

There are 3 types of plug-ins that we offer at this time:

Microsoft O365 Reporting Plug-In

The Microsoft version of KillPhish is an advanced email threat protection add-in for Microsoft 365.

- Reported Phishing Emails will be counted in your testing data ✓
- Works on Outlook Web App (OWA), Outlook for desktop, Windows and Mac, Outlook for iOS, and Outlook for Android ✓
- KillPhish can give an email a risk assessment (low, medium, or high risk) ✓
- Reporting button enables reporting of phishing and other types of threats ✓
- Helpful Tips ✓
- Customizable Colors ✓
- Ability to turn certain functionalities on and off ✓
- Optional customizable success message for reporting phishing simulations ✓
- Links reviewed by Google Safe Browsing ✓
- Spam confidence level evaluated by Microsoft ✓

Report Phishing Outlook Add-in (64-Bit Machines)

The Report Phishing Outlook add-in (also referred to as the COM add-in) allows your users to report phishing emails they receive in their inboxes in the Outlook desktop app.

- Reported Phishing Emails will be counted in your testing data ✓
- Mainly for On-Prem/64-bit machines ✓
- Works only on outlook desktop, 64-bit versions of Outlook that are running on a 64-bit Windows machine ✓
- Optional customizable success message for reporting phishin simulations ✓
- Does not distinguish between the simulations vs. email ✓

Microsoft O365 Reporting Plug-In

- Lite version of the Reporting plug-in ✓
- Users can report an email by opening the message and clicking the icon that appears after installation ✓
- No Advanced Threat Protection/Email Risk Assessment ✓
- Reported phishing goes to Reporter Email Address and Additional Reporter Addresses ✓
- User will need to be a target in the phishing portal to report emails with this plugin ✓
